Examiner's Amendment

Applicant's election of Group I in the reply filed on 05 May 2005 and the subsequent election of Species A in the reply filed on 29 August 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

This application is in condition for allowance except for the presence of claims 10-26 drawn to a non-elected species, sub-combination, and combination without traverse. **Claims 10-26 have been cancelled accordingly.**

Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Referring to claims 1-9, the prior art searched and of record neither anticipates nor suggests in the claimed combinations, a plurality of mutually different character determination methods for determining whether a pixel of interest corresponds to a character or a line drawing on the basis of a calculated feature amount of the pixel and selecting one of the determination results of one of the character determination methods in accordance with a sensed background density or background color of a region surrounding the pixel of interest.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited Art

The art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujiwara et al (US 4813078) discloses performing character recognition through the joint use of the direction of density and the background density.
